- Multistage Air Cleaner
- **UVC Light Kills Viruses and Bacteria**
- PCO to destroy particles as small as 0.001 microns
- Sleek sensor touch controls
- Filter change indicator
- **Recommended for rooms up 25m2 at 4 air changes per hour**
- Works in rooms up to 45m2 at 2 air changes per hour
- Night Mode
- Two year parts and labour warranty

The Comefresh CF8500 Air Purifier system offers extremely high air filtration efficiency capturing up to 99.97% of particles including allergens, pollen, dust, smoke and pet dander.

This is done by means of an advanced multi-stage cleaning system:

- Pre-filter (removes the large airborne particles)
- True HEPA filter (removes particles from the air as small as 0.3 microns – smaller than the eye can see)
- Carbon filter (removes smells and odours)
- Photocatalytic Oxidation (PCO) is a very powerful air purification technology and has the ability to destroy particles as small as 0.001 microns

With it's built in UVC Light, the Solenco CF8500 Air Purifier comes highly recommended to protect public facilities, doctor's rooms and hospital rooms for patients. It further reduces VOCs, toxic fumes and foul odours.

Unlike many portable air purifiers, the Solenco CF8500 Air Purifier is extremely quiet (less than 29dB on low speed and less than 49dB on high speed). The Solenco CF8500 Air Purifier features feather-touch controls that enable you to quickly and easily change the settings as you run your fingers over the panel. The enhanced charcoal and HEPA filters on the Solenco CF8500 have a rubber gasket seal to ensure that no air leaves the air purifier uncleaned.

New Night Mode Function - Press the replace filter button and this will turn off the lights and reduce the fan speed to its lowest mode.

Perfect for those essential services still in operation, including doctors rooms, doctors' offices, hospital rooms etc

- Doctors/Dentists rooms will have high risk with people having various illnesses in one waiting room. So perfect for protecting these waiting patients.
- Receptionists and doctors are at high risk being exposed daily.
- Once lockdown is lifted, people will be working again in close quarters to one another and more so than ever will need additional protection.
- Doctors can recommend for cancer patients who are at higher risk with their weakened immune systems. These are perfect for cleaning the air they will breathe. Perfect for a bedroom or small living area.

Other features include:

- Innovative tower design
- Feather-touch controls
- Night Mode
- Energy-efficient (only 55 watts)
- Energy Usage (based on R1.46 per kw/hr) - continuous running works out to 3c per hour!
- Multi-stage purification system
- Traps up to 99.97% of particles
- Kills bacteria and viruses
- Reduces VOCs, toxic fumes and odours
- 4 speed settings - includes new Turbo setting
- Timer with 3 settings (2hr, 4hr and 8hr)

Very neat units. Whisper quiet operation at low and mid speeds.
The timer function is especially useful.
Will see how long the filter lasts, but there are spares available
