

“Pulsed Electromagnetic Fields (PEMFs) address impaired chemistry and thus the function of cells – which in turn, improves health. PEMFs deliver beneficial, health-enhancing electromagnetic fields and frequencies to the cells. Therapeutic PEMFs are specifically designed to positively support cellular energy, resulting in better cellular health and function.”

-Dr. Pawluk

Resonance Therapy SA

Resonance Therapy SA is a South African based company in business since 2010.

We specialize in frequency technology and pulsed electromagnetic field (PEMF) therapy products, developed and manufactured exclusively in South Africa. Our products are scientifically sound, of good quality and supported by ongoing research.

We pride ourselves in excellent customer service and after sales technical support.

We believe in the body's potential to heal itself and that PEMF therapy strengthens this ability.

We are the sole distributors of the MyBio Pulser and MyBio Tracer (Electronic Pathogen Detector).

MyBio Pulser

*“One device,
a thousand possibilities”*

What You Get

The MyBio Pulser is a cost effective, easy to use PEMF device suitable for all ages. It has a square wave range capability of 0.1 Hz up to 50 000 Hz for effective treatments and has the ability to accommodate Magnetic Field Therapy up to 1000 Hz with additional accessories. This therapy enables wave penetration of bone and muscle more effectively.

The unit operates by a single tuning knob combined with a LCD display for ease of use. Pre-loaded treatment programmes ensure that a wide range of ailments can be addressed in the comfort of your home.

MyBio Pulser Benefits

Anti-allergen

Improves Circulation
