HOBOT LEGEE-688 Vacuum-Mop 4 in 1 Robot

These robotic vacuum cleaners are designed to take the hassle out of your day by helping you keep your floors clean and your health uncompromised.

The Hobot Legee-688 robotic vacuum cleaner and mop, is ideal for hard floors such as hardwood, tile, vinyl and stone. These units have a FastBrush 4-Stage Cleaning system which will comprehensively clean your floors in a few moments. It also takes care of vacuuming, dry mopping, automatic water dosing and wet mopping. The Hobot Legee-688 comes with the added benefit of being controlled through a mobile app.

What differentiates the Legee-688 from its competitors is that it does not just drag a mop, rather its front and rear cleaning pads scrub the floor 600 times per minute. This unit automatically dispenses water so it is not suitable for use on carpets.

Hobot Legee-688

The LEGEE-688 4-in-1 offers an ingenious combination of two robotic cleaning appliances and features **Talent Clean** which gives you the option of 7 customizable cleaning modes to suit your needs.

1. Kitchen 2. Polish 3. Pet 4. Strong 5. ECO 6. Dry 7. Standard.

The APP allows you to adjust the Spray Volume, Suction Power, Mopping Frequency and Moving Speed. You can also choose whether the unit must clean along the walls, parallel, spot clean or simply select auto.

When the battery starts to run low the Hobot automatically returns to its charging base.

Additional features:

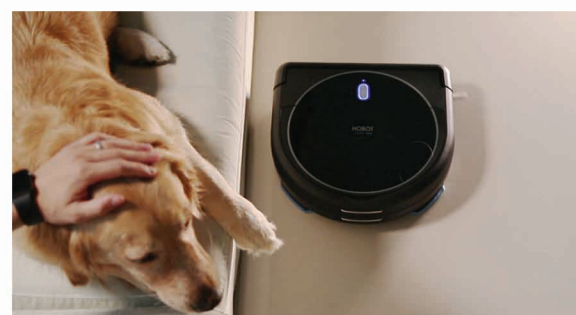

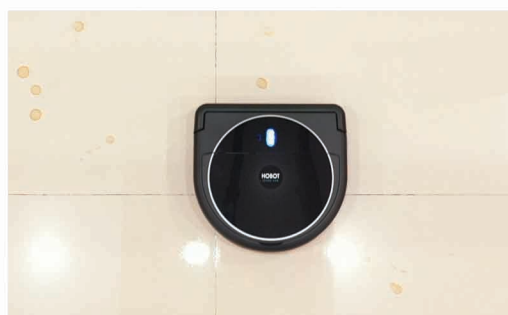

- New Brushless DC Motor and Samsung Li Ion battery.
- Vacuum comes with a side brush and 2 vibrating mops
- Mops are made of microfiber and are designed for **dry and wet cleaning**.
- Fitted with a high efficiency filter.
- **Equipped with anti-fall sensors.**
- Fluid mechanics suction head.
- Great for vacuuming animal hair.

Wifi connectivity so you can control your Robot with an APP on your phone. Real Time Map, Schedule Queue and Cleaning Diary.
