Description

The DNA Smart Airfryer offers a large capacity 5.7l with visible window that allows you to view the progress of your meal without opening the

basket, therefore ensuring that the heat remains trapped for the fastest and best cooking results.

Enjoy delicious-tasting air-fried food with 85% less fat, whilst saving 20% electricity, with the unique Carbon Fibre Tube Technology providing 360° instant heat, which is more efficient relative to other airfryers with old-technology steel heating elements.

Best of all you can now optionally operate the DNA Smart Airfryer from your mobile device as well as view, collect and share recipes. Finally, the temperature range of 40-200°C allows you to air fry, frill, roast, bake, dehydrate, preheat, defrost and air boil.
