Description

Description

The NEW DNA Water Purifier is a counter-top Water Purifier requiring no installation and featuring 4-Stage Water Purification including Filtration via Reverse Osmosis, as well as 5 different temperature settings from ambient temperature of 25°C up to 95°C, therefore producing instant hot water on demand. The sleek and compact design of the DNA Water Purifier, the ability to dispense filtered water in 150ml, 250ml, 330ml and continuous flow volume intervals as well as the ease of changing filtration cartridges in 5 seconds makes it a must have for all households requiring pure and safe drinking water for the entire family.
