- Multi Award Winning Dehumidifier
- Low Energy Dehumidifier that leads the way to lower bills
- For cellars, medium to 5 bedroom homes and archives
- Part of the exclusive Meaco Platinum Range
- Two year parts and labour warranty

The Meaco Low Energy Dehumidifier, part of new Platinum Range of Meaco dehumidifiers, is a proven way to dehumidify whilst using less energy. If you live in a three to five bedroom house and suffer from condensation, mould or damp then this model will deliver excellent results.

HEPA Filter to Clean the Air

The 20L dehumidifier comes with a HEPA filter in the box which will allow you to clean the air in the area the unit is working. This is especially important as we spend more time in doors and will help create a healthy living and work from home space.

Meaco Control Logic for Low Running Costs

Using just 255 watts of power and with the unique Meaco Control logic technology, you get a very cost effective and accurate solution to drying your home and dealing with damp. The Meaco system runs the dehumidifier to your chosen target relative humidity and then once the humidity has stabilised it puts the dehumidifier into sleep mode waking it up every 30 minutes to test the air until it has to start dehumidifying again.

Does more than just prevent mould, condensation and damp.

This dehumidifier is packed with lots of useful features like a motorised rotating louvre to help dry washing faster, a large front loading water tank, two fan speeds, an off timer, a digital display to show you the room humidity, a variable humidistat and a child lock. It comes with a strong carry handle and large castors to make it easy to move the dehumidifier when you want to dry laundry or dry the kitchen or bathroom.

Technical specifications:

Brand Meaco

Compressor or Desiccant? Compressor

Power Consumption 255W

Energy Usage (based on R1.46 per kw/hr) - continuous running 37c per hour

Noise level Maximum 46dB(A)
