Description

MyBio Pulser: A modern and compact device for all ages

The MyBio Pulser is a modern and compact PEMF therapy device that is easy to operate and perfectly suited for young and old. It is a cost-effective PEMF therapy device that is battery-operated, portable and operates with a convenient touch screen.

The MyBio Pulser generates electromagnetic frequencies to address impaired cell chemistry. It has made a positive impact on many physical

and mental conditions.

All frequencies generated by the MyBio Pulser and MyBio Tracer are quartz crystal controlled.

Features

- 299 pre-programmed treatments and 15 custom programs
- Pre-programmed CAF (consolidated annotated frequency) list of 1614 treatments
- Frequencies unique to the model include Brian Stenulson's *Beneficial, Normalizing and Stimulating* frequencies, the Bach flower remedies, and the Solfeggio frequencies
- Up to 7 groups can be created
- Hulda Clark Zapper
- Graphic display to indicate procedures
- A fully functional frequency generator for pulsed electromagnetic units that can drive self-adhesive electrodes, handheld electrodes, a treatment mat, and a magnetic unit
- Custom programs can be changed via a personal computer (Windows operating system)
- Built-in 4-hour rechargeable battery
- Adjustable brightness of the LCD
- International IEC 60601-1 standard approved & Made in South Africa. Local support, advice, after sales service and accessories available.

Included

- Protective case
- MyBio Tracer/Pulser device
- USB wall charger and cable
- 2 x adhesive skin contact electrodes
- USB data download cable (sync and charging with USB type C)
- USB thumb drive with installation programs

Optional

- Small treatment mat - 60 x 80cm
- Large treatment mat - 60 x 120 cm

Technical specifications

- Input power: 5-volt USB charger
- Built-in battery pack: 3.7-volt 2000mA-H (up to 4 hours standby)
- Power consumption: 210mA
- Power supply: USB cell phone charger
- Size: 120 x 65 x 45 mm (PEMF device size)
- Output Frequency Pulser unit: 1.0 hertz to 40 kilohertz
- Resolution: 0.01 hertz
- Signal shape: Square wave
- Rise and fall times: 100 - 500 nanoseconds, depending on load and output voltage
- Output Voltage: Adjustable from 1 to 18-volt peak to peak
- Signal polarity: DC
- A quartz crystal oscillator accuracy of 20 parts per million at 25 degrees Celsius with a temperature deviation of 0.006 parts per million per degree Celsius

Benefits

Pulsed electromagnetic field (PEMF) therapy uses electromagnetic fields to treat the symptoms and underlying causes of illness and disease. It is based on the knowledge that our bodies are electromagnetic sensitive and an imbalance or disruption of homeostasis within our bodies may lead to illness. By adding healing frequencies, symptoms may improve and help the body to function optimally.

PEMF therapy can be used to improve blood circulation, lymph drainage, cell growth, and more to increase overall physical and mental well-being.

*One of the **key benefits** of PEMF therapy is that it can relieve inflammation and support enhanced functional recovery. The anti-inflammatory effects are due to several physiological and biochemical reactions.*
