COMBATS MOULD, CONDENSATION & DAMP

Take control of the humidity in your home or office with this low energy 30L dehumidifier and air purifier from Solenco. Remove excessive moisture in areas from your flat to homes with up to 6 bedrooms, this powerful yet incredibly energy efficient dehumidifier provides a cost effective solution in combating damp, mould, excessive moisture and condensation.

BREATHE A SIGH OF RELIEF

While some dehumidifiers just provide one stage filtration, this model features an advanced 6 stage air filter purification system including a HEPA, Ioniser and UV technologies to remove 99% of airborne contaminants such as bacteria, pollen & mould spores! It's as powerful as a standalone air purifier and ideal for those who suffer from asthma, hay fever or allergies.

EFFICIENT PERFORMANCE

If the humidity is too high then your home is at risk of mould. Thankfully, the air purifier and dehumidifier boasts a digital display at the front of the unit that shows you the current humidity level in the room, so you only have to look over to see what percentage it is to know whether the humidity is too low, too high or just right. We suggest anywhere between 50% - 60% and you'll be fine!

LAUNDRY MODE

If you're finding it difficult to dry laundry outside due to the rain, then you'll be pleased to hear that dehumidifier comes with a handy laundry mode setting that significantly reduces the drying time of damp laundry indoors. This clever little feature will also benefit your heating bills too because you won't have to use your tumble dryer to dry your clothes.

Compressor or Desiccant? Compressor

Power Consumption 360W

Energy Usage (based on R1.46 per kw/hr) - continuous running 53c per hour

Noise level Maximum 45dB(A)

Air Flow (nominal) 200 m3/hr

Humidistat Yes, from 35 to 80%rh in 5%rh steps

Auto restart Yes
