

MARKETING PROPOSAL

PROFESSIONAL POWER BLENDER SERIES

PRO CB850

SPEC

Product Specifications

Name	Professional Power Blender
Model Number	- CE : CB850E - CB : CB850B - etc : CB850
Product Size	233 x 255 x 459 (mm)
Weight	7.4Kg
Rating Voltage	AC220-240V, 50/60Hz
Power Consumption	1,700W
Rating Time	Less than 3 minutes (Per 1 time)
Container Capacity	- Maximum Capacity of blend: 1,400ml - Maximum Capacity for general ingredients (Fruits, vegetables, liquid, Ice, etc.) : 1,400ml - Maximum Capacity for dairy ingredients (Milk, soy milk, dry milk, etc.) : 800ml
Components	- motor base, soundproof enclosure, blender container, lid, manual, recipe book, quick guide.
Country of Manufacture	Republic of Korea

Product Features

Application of Noise Reduction Technology

SILENCE-TECHNOLOGY

We have applied Kuvings' unique silence - technology to achieve low-noise, low-vibration blending.

The main body with Kuvings' unique silence - technology, combined with the Sound Enclosure, effectively reduces operational noise and minimizes vibrations, providing a quiet working environment.

Product Features

Dual Safety Operation System

Dual Safety Operation System

A dual safety operation system has been applied to ensure the unit only operates when the container is properly attached to the main body and the Sound Enclosure is fully closed.

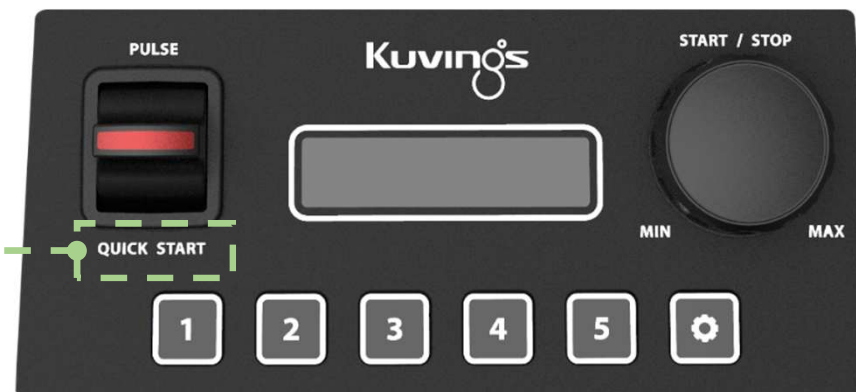

- It is not possible to blend using only the container without the Sound Enclosure.

* During blending, the stop function activates if the Sound Enclosure is opened, preventing safety accidents and extending the lifespan of components (such as couplings and blades).

Product Features

Convenient Operation Button

Quick Start Lever Designed with User Environment in Mind

- By designating frequently used menu buttons, user convenience is maximized.
- It allows for quick and easy use, enhancing both efficiency and convenience.

Product Features

Container for Smooth Blending

Stable Blending & Easy Cleaning

The container is designed to facilitate an enhanced rotation mechanism, guaranteeing a smooth and uniform blending of ingredients. This ensures stable blending, minimizing the amount of ingredients that stick to the container walls and lid during high-speed blending, and makes cleaning more convenient.

Eco-Friendly Material

Made from BPA-free eco-friendly material 'Tritan,' it is free from concerns about environmental hormones and is resistant to external impacts and heat, ensuring safe usage.

Product Features

Powerful Commercial Motor

High-Performance Powerful Motor(1700W)

The 1700W powerful motor efficiently blends all ingredients, from hard ice to tough fibers. Additionally, it offers excellent durability and heat resistance for stable long-term use.

Commercial-Grade Durable Blades for Perfect Blending

The finely designed straight blades offer excellent strength and durability, blending ingredients to a uniform and smooth texture.

Product Features

Intuitive Control Panel

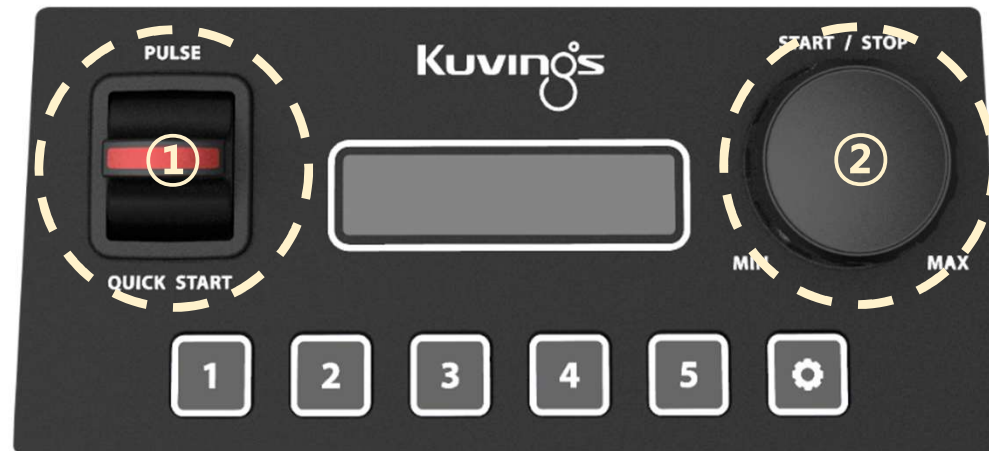

Easy Operation Control

The intuitive panel design (lever, jog wheel, touch panel) enhances user visibility and allows for convenient and quick operation in commercial environments.

Product Features

Features Optimized for Commercial Environments

① Momentary Operation(Upper Lever) / Quick Start Blending(Lower Lever)

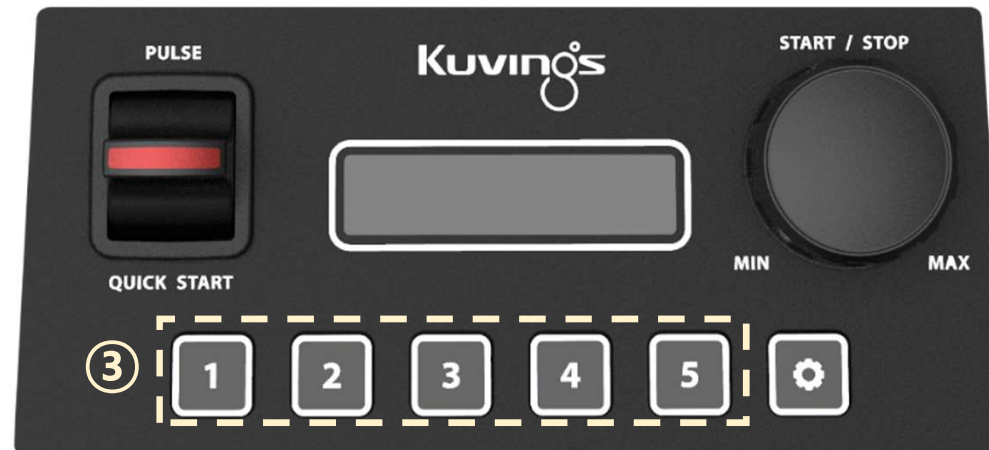

- **Quick Start Blending:** This function is used to operate the most frequently used button among the auto blending buttons.

② Jog Wheel

- Used to adjust pulse and continuous blending speeds.
- Also used to enter setting mode, change settings, and save them.
- Select the desired setting menu using the jog wheel.

Product Features

Features Optimized for Commercial Environments

③ 35 Recipe Programming Function

- The device comes with 35 pre-programmed recipes optimized for café menus, allowing you to easily set your desired recipes to the menu buttons (1 to 5) for convenient use.

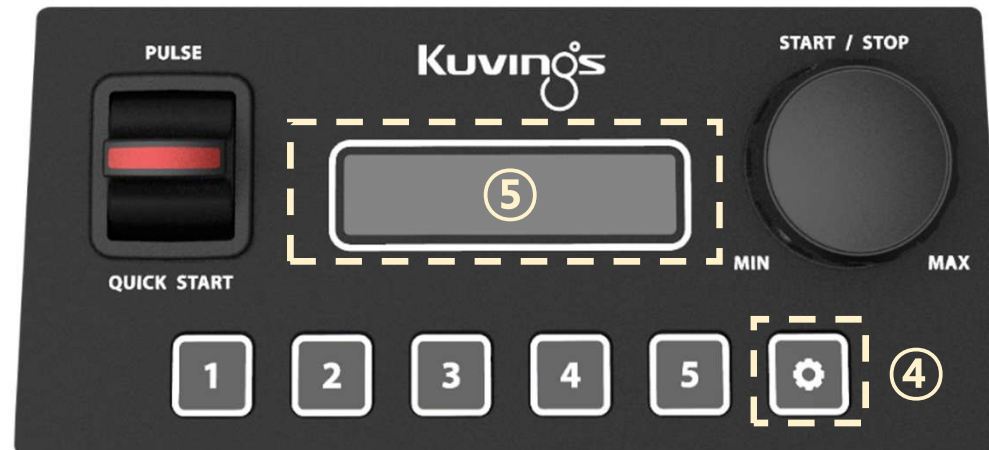

A recipe book containing 86 recipes suitable for commercial use is also included in the package.

Product Features

Features Optimized for Commercial Environments

④ DIY(DO IT YOURSELF) Mode (Self-Setting Mode)

- Users can create custom recipes by setting the blending speed and time.

⑤ Display

- Provides various information to the user, including blending algorithms and Operation time.

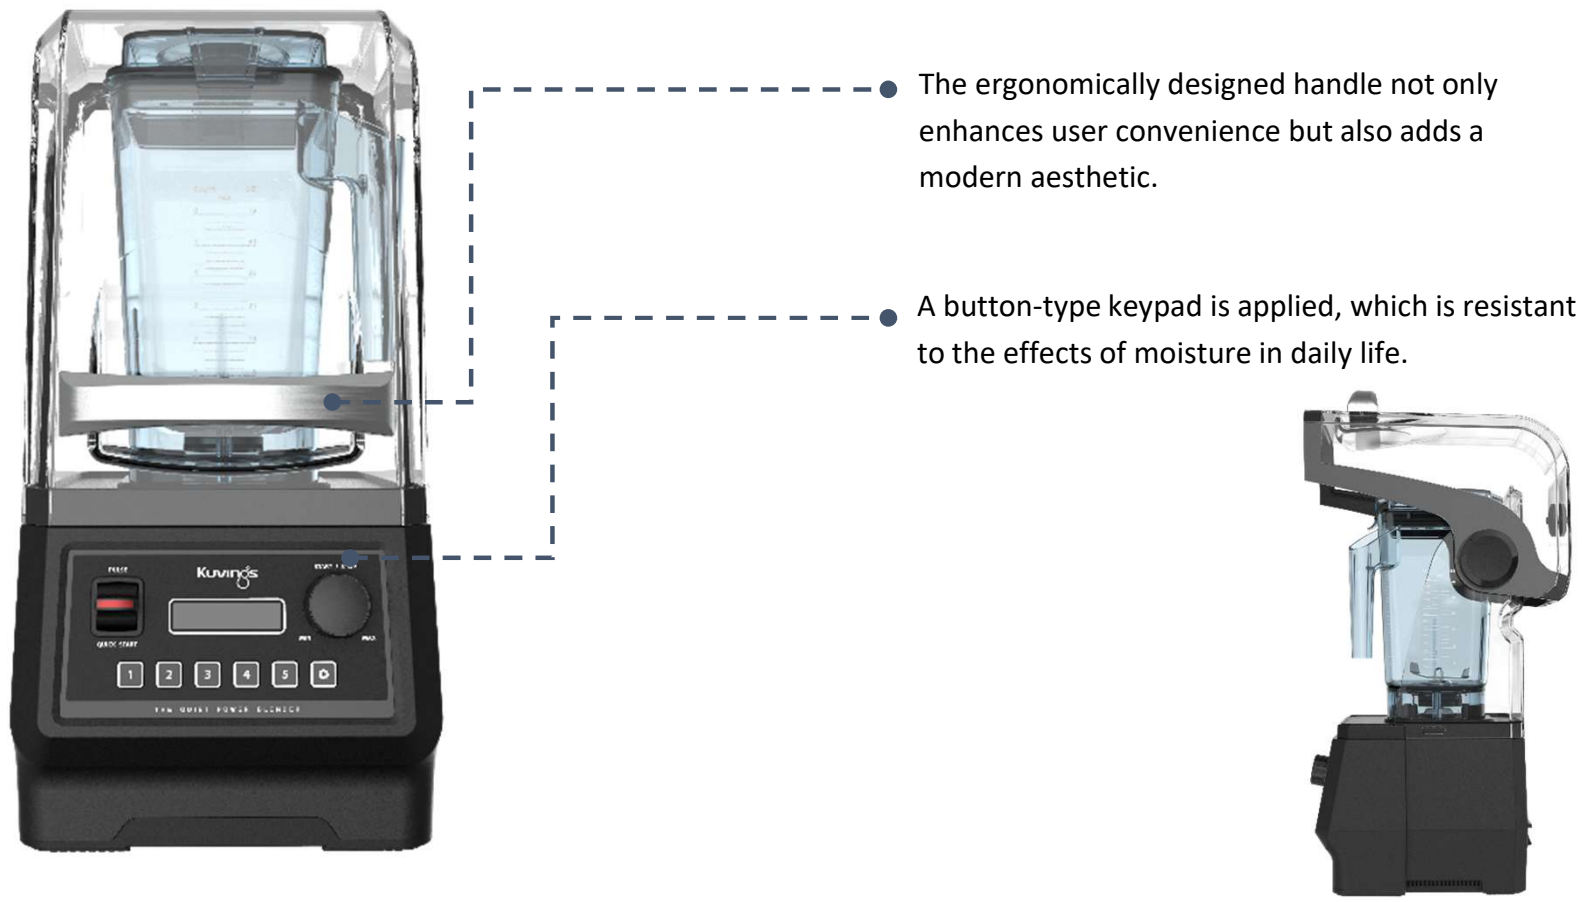

Product Features

Simple Design

Design Optimized for Commercial Environments

Utilizing CMF Optimized for Commercial Environments to Provide a Premium Image.

The black-colored body, combined with an intuitive control panel design, perfectly integrates into any store atmosphere.

Product Features

Reliable Quality & Service

① MADE IN KOREA

This is a MADE IN KOREA product, designed and produced entirely in-house based on 45 years of technological expertise.

② Kuvings' unique commitment to Satisfaction

The motor comes with a 2-years warranty, while other components have a 1-year warranty. With the purchase of The product, you will receive a recipe book containing 60 recipes developed by Kuvings.
